JULIUS DAGANA

Full-Stack Software Engineer | AI & Cybersecurity Enthusiast
daganajulius5@gmail.com | 0553280522 / 0556338456| Accra, Ghana
Portfolio | GitHub | LinkedIn

SUMMARY

Results-driven **Full-Stack Software Engineer and AICE-certified AI** graduate with hands-on experience designing and deploying scalable web and mobile applications using **React, React Native, Next.js, Node.js, Firebase,** and the **MERN** stack. Proven ability to translate business requirements into clean, maintainable code while optimizing performance, security, and user experience. Adept at rapid learning, problem-solving, and building user-focused systems that deliver measurable impact.

SKILLS

Frontend:
React, Next.js, React Native, Flutter, Tailwind CSS, Bootstrap, Shadcn, DaisyUI, MUI, Zustand, React Navigation, Expo, React Native Maps, Reanimated, Gesture Handler

Backend:
Node.js, Express.js, MongoDB, Firebase, Cloudinary, Redis, Socket.io, Mongoose, PostgreSQL, MySQL, Laravel, SQLite,

Languages:
JavaScript (ES6+), Dart, HTML5, CSS3, Python,TypeScript, PHP, SQL.

APIs & Integrations:
REST APIs, Weather APIs, Geolocation APIs, Firebase Auth, Multer, ImageKit, Nodemailer, AfricasTalking, Axios

Testing & DevOps: Jest, Docker, GitHub Actions, Playwright, Coolify, Cpanel, Vercel, Netlify, Render, CI/CD, Node-Cron, React Native Testing Library, Supertest, Maestro E2E Testing, MongoDB Memory Server, Sentry Monitoring

Security & Architecture:
RBAC, JWT, OAuth, Data Encryption, MVC & Modular Architecture, Helmet, CORS, Rate Limiting, Mongo Sanitize, XSS Protection, bcryptjs.

PROJECTS

Full-Stack Web App Developer – School Management System (Grade A+) *Personal Project | Jan 2025*

- Architected and delivered a **multi-role** school management platform supporting **4 user roles**, with modular architecture and scalable access control.
- Implemented **RBAC and secure authentication flows**, ensuring compliant access to sensitive academic data.
- Built **real-time dashboards and reporting pipelines** for academic performance monitoring and stakeholder communication.
- Optimized rendering and database queries, **reducing dashboard load time and improving concurrent request handling**.

Full-Stack Web App Developer – WaterTracker *Personal Project | May 2025*

- Architected and developed a hydration-tracking application with **secure Firebase Authentication** and **Firestore-based data persistence.**
- Integrated real-time weather and **geolocation APIs** to dynamically personalize hydration recommendations and improve user relevance.
- Deployed and maintained the production application on **Vercel**, implementing environment configuration and build optimization.

Full-Stack Web App Developer – EasyProfile *Personal Project | Sept 2025*

- Architected and delivered a secure credential management system for storing and reusing **sensitive user credentials** with strong access controls.
- Integrated **Cloudinary** for secure and optimized media storage, implementing controlled upload and retrieval workflows.
- Implemented protected routes, encrypted data handling, and responsive **UI architecture** to ensure data security and consistent user experience across devices.

Full-Stack Mobile developer – eWorld App *Personal Project | Nov 2025 – Present*

- Dockerized backend services for consistent deployments
- Built automated unit, integration, and E2E testing pipelines
- Added advanced API security protections against XSS, NoSQL injection, and abuse attacks
- Integrated Redis caching for performance optimization
- Configured crash monitoring and production observability using Sentry
- Implemented multilingual support using i18n-js
- Optimized image uploads and delivery using ImageKit

EXPERIENCE

Full-Stack Developer – Jnard IT Consult *Sept 2025 – Present*

- Architected a team & project management platform with role assignment, task tracking, and performance monitoring, improving operational efficiency by **25%.**
- Designed issue-reporting & project-review modules, enhancing **transparency and reducing resolution time** by **30%.**
- Contributed to a **MERN-based** internship management system, streamlining applicant tracking across active, recruiting, and closed phases.
- Implemented recruiter shortlisting workflows with automated notifications, reducing manual communication by **40%.**
- Mentored **2 junior developer**s and conducted code reviews to enforce best practices.
- Collaborated in **agile teams**, leveraging **GitHub-based CI/CD pipelines** to ensure production-ready deployments.

Full-Stack Software Engineer – Geeks Global Tech *Sept 2026 – Present*

- Designed issue-reporting & project-review modules, enhancing **transparency and reducing resolution time** by **60%.**
- Architected a team & project management platform with role assignment, task tracking, and performance monitoring, improving operational efficiency by 80**%.**
- Troubleshooting and resolving technical issues across the stack, reducing bug resolution time and functional team members.
- Collaborated in **agile teams**, leveraging **GitHub-based CI/CD pipelines** to ensure production-ready deployments.

EDUCATION & CERTIFICATIONS

Full-Stack Engineering Student / Ai / ML – Codetrain Africa *Sept 2024* – Graduating Next Month
AICE Certification in Artificial Intelligence – ALX Africa *Sept 2025 – Oct 2025*
Ongoing Self-Study in Cybersecurity *Oct 2025 – Present*
